Electronic Lime Scale Control System
for Agriculture Applications

POULTRY PRODUCTION
Combat lime scale buildup in Bell Waterer and Nipple Drinker system
- Treats flow control valves and triggers
- ScaleBlaster will reduce biofilm by removing lime scale deposits which act as a breeding ground
- Significantly improve savings and labor, chemicals and general cleaning between flocks
- Cleaner systems improve water flow and wet litter concerns

Maintains a Scale & Sludge Free EVAPORATIVE COOLING System
- COOL CELL PADS operate with better efficiency, providing energy savings and improved cooling
- Improves the COOL CELL PAD replacement cycle
- Evaporative cooling water lines and pumps

Enhance the performance of medicators and enable them to work at designed levels of accuracy with constant scale control

Improve the performance of water cooled components (utility savings)
- Refrigeration equipment
- Misters

Improve the performance of heated water components
- Incubator humidification
- Heating /Boiler systems run with improved thermal efficiency

Combat lime scale in Plant infrastructure
- Performance improvement and savings in Cooling Towers, Chillers, Boilers and Wastewater.
- System wide HVAC applications for scale control
- Eliminate lime scale in flow control and spray valves for cleaning and disinfecting wash
- Ongoing lime scale control in Plant and Domestic Water Systems
- Significant savings in labor, chemical and down time costs

How ScaleBlaster Works
An electronic signal hits the resonant frequency of the calcium molecules causing them to lose their adhesive properties.

Incoming water containing calcium molecules.

Calcium molecules no longer adhere to any surface or form lime scale deposits.

ScaleBlaster.com

ScaleBlaster AG units carry a 5 year parts and labor warranty

SCALEBLASTER does not remove the calcium from the water. The calcium remains in-solution

• Electronic Lime Scale Control System
• Very low energy usage
• Proven scale control performance in thousands of installations world wide
