**Added Benefits**

- Soap may lather up more & rinse off easier
- Skin may feel smoother & hair more manageable
- Brighter, whiter & longer lasting clothes, towels & sheets

**How ScaleBlaster Works**

Incoming water containing calcium molecules.

A scientifically developed signal hits the resonant frequency of the calcium molecules causing them to lose their adhesive properties.

Calcium molecules no longer adhere to any surface or form limescale deposits. Existing limescale is dissolved and never returns.

**Tankless Water Heater Solution**

The heat exchanger in tankless water heaters will foul up with scale deposits rapidly & require regular service calls to flush out the lines with CLR or vinegar. *ScaleBlaster* will eliminate that.

**Protect Your Appliances**

Your appliances & fixtures that come in contact with hard water will operate much more efficiently and will have a prolonged life expectancy with *ScaleBlaster* installed.

**Works on Copper, PVC, CPVC & PEX pipe**

**Residential Models**

The SB-75 is available at most Home Depot stores in the USA and Canada; HomeDepot.com and HomeDepot.ca

The SB-Elite is available at HomeDepot.com and HomeDepot.ca

ScaleBlaster is the eco-friendly, healthy & economical alternative to your hard water problems.

Water Softeners replace calcium with salt. They waste water and discharge hazardous brine into our water systems.

With ScaleBlaster, the calcium remains in the water, which is beneficial for the human body. Why remove it?

No Salt No Chemicals No Filters No Maintenance

Works on Copper, PVC, CPVC & PEX pipe

ScaleBlaster.com

Solving Endless Problems

ScaleBlaster will remove limescale deposits while prolonging the life of…

- Piping system

- Radiant heating

Removes & Prevents Limescale Formation
Healthy & Eco-Friendly Solution to Hard Water
Ideal for Tankless Water Heaters
Prolongs the life of Appliances

No Salt No Chemicals No Filters No Maintenance

The Clear Choice

Works on Copper, PVC, CPVC & PEX pipe

The new Homeowner’s Models are economically priced and can be installed by the homeowner with no plumbing work required in most cases. There are two models to choose from – the SB-75 and the SB-Elite.

SB-75
- Indoor installations only
- Homes under 4,000 square feet
- Calcium hardness (Ca) levels up to 19 grains per gallon (gpg) or 325 parts per million (ppm)
- Works on pipe size up to 1/2”
- 3-year warranty

SB-Elite
- Indoor or outdoor installations
- Homes up to 5,000 square feet
- Calcium hardness (Ca) levels up to 35 grains per gallon (gpg) or 600 parts per million (ppm)
- Works on pipe size up to 1/2”
- 3-year warranty

Water Softeners vs. ScaleBlaster®

- Expensive to purchase & maintain
- Requires continuous maintenance
- Takes up lots of floor space
- Requires continuous purchasing of salt
- Harmful for people on salt restricted diets
- Intrusive to the water
- Increases water & sewer bills greatly

- Affordable, one-time investment
- Never requires maintenance
- Mounts on a wall
- Requires no salt or chemicals
- Safe for people on salt restricted diets
- Non-intrusive to the water
- Does not require any additional water usage

The Problem

- Makes skin feel dry
- Makes water feel slippery
- Soap suds difficult to remove

The Result

- Makes skin feel softer
- Makes water feel “Silkier”
- Soap suds wash away easily
